Constraint Modelling and Reformulation (ModRef'09)

Eighth International Workshop
Lisbon, Portugal, September, 2009
Proceedings

Held in conjunction with the
Fifteenth International Conference on
Principles and Practice of
Constraint Programming (CP 2009)

Foreword

Many organisations have scheduling, allocation supply chain and other problems that could be solved with a constraint programming toolkit. Although the solution of these problems is of vital importance, constraint programming toolkits are not widely used because there is insufficient expertise available to model problems as constraint programs.

This so-called modelling bottleneck could be reduced by the development of a general, principled understanding of modelling that in the future could guide the manual or automatic formulation of models and the choice among alternative models.

Researchers and practitioners have developed effective models for a wide range of problems. The time has come to form generalisations from these case studies that can be used to guide modelling in the future. These generalisations could then be systematised for use by a non-expert and be codified in textbooks in much the same way that data structuring expertise is. Ultimately this modelling expertise could be embedded in automated modelling tools. Progress on any of these fronts would bring the proven power of constraint programming to a wider user base.

The Eighth International Workshop on Constraint Modelling and Reformulation has been convened to provide a forum for researchers who share these goals. This volume contains fourteen contributed papers, which have been reviewed by the programme committee.

We wish to thank all the authors who submitted papers to the workshop; the members of the programme committee; and the CP'2009 Tutorial and Workshop Chairs, Ian Miguel and Patrick Prosser.

August 2009

Alan M. Frisch and Jimmy Lee
Programme Chairs

Programme Committee

Sebastian Brand (University of Melbourne, Australia)
(Co-Chair) Alan M. Frisch (University of York, United Kingdom)
Chris Jefferson (Oxford University, United Kingdom)
(Co-Chair) Jimmy Lee (The Chinese University of Hong Kong, China)
Toni Mancini (Sapienza University of Rome, Italy)
Ian Miguel (University of St Andrews, United Kingdom)
Helmut Simonis (University College Cork, Ireland)
Pascal Van Hentenryck (Brown University USA)

Additional Reviewers

Thibaut Feydy (University of Melbourne, Australia)
Y.C. Law (The Chinese University of Hong Kong, China)
May Woo (The Chinese University of Hong Kong, China)

Table of Contents

Decomposition of the NVALUE constraint	1
<i>Christian Bessiere, George Katsirelos, Nina Narodytska, Claude-Guy Quimper, Toby Walsh</i>	
Extending Soft Arc Consistency Algorithms to Non-Invertible Semirings with an Application to Multi-Criteria Problems	16
<i>Stefano Bistarelli, Fabio Gadducci, Javier Larrosa, Emma Rollon, Francesco Santini</i>	
SIMPLY: a Compiler from a CSP Modeling Language to the SMT-LIB Format	30
<i>Miquel Bofill, Miquel Palahí, Josep Suy, Mateu Villaret</i>	
Debugging Constraint Models with Metamodels and Metaknowledge	45
<i>Eugene C. Freuder, Richard J. Wallace, Tomas E. Nordlander</i>	
Markov Logic as a Modelling Language for Weighted Constraint Satisfac- tion Problems	60
<i>Dominik Jain, Paul Maier, Gregor Wylezich</i>	
On the Specification of Search Tree Ordering Heuristics by Pattern Match- ing in a Rule-Based Modeling Language	73
<i>Julien Martin, Thierry Martinez, François Fages</i>	
Preprocessing in Pseudo-Boolean Optimization: An Experimental Evaluation	87
<i>Ruben Martins, Ines Lynce, Vasco Manquinho</i>	
Tractable Benchmarks	102
<i>Justyna Petke, Peter Jeavons</i>	
The Cost of Flattening with Common Subexpression Elimination	117
<i>Andrea Rendl, Ian Miguel, Ian P. Gent</i>	
Lessons Learned from Modelling the NHL Playoff Qualification Problem ..	132
<i>Tyrel Russell, Peter van Beek</i>	
Comparing Dual Viewpoints in Permutation Problems	147
<i>Barbara M. Smith</i>	
The Evolving World of MiniZinc	156
<i>Peter J. Stuckey, Ralph Becket, Sebastian Brand, Mark Brown, Thibaut Feydy, Julien Fischer, Maria Garcia de la Banda, Kim Marriott, Mark Wallace</i>	

Monadic Constraint Programming with Gecode	171
<i>Pieter Wuille, Tom Schrijvers</i>	
When Can I Get a Quick Shave?	186
<i>Alessandro Zanarini, Gilles Pesant</i>
